Frequency $1 \begin{array}{lllllllllllll} & 2 & 3 & 4 & 5 & \text { times/week } & \text { Duration } & 1 & 2 & 3 & 4 & 5 & 6\end{array}$ weeks
***Range of motion is an important progression of therapy, but limiting swelling is important.
Respecting swelling will decrease pain and improve motion..***

| CPM: 2-3 times a day for 2 hours each session, increasing 5-10 a day |  |  |  |  |

Every patient's therapy progression will vary to a degree depending on many factors. Please use your best clinical judgment on advancing a patient. If other ideas are considered to improve patient's outcome do not hesitate to call.

Patient's recovery is a team approach: Patient, family/friend support, therapist, and surgeon. Every team member plays an important role in recovery.
